EN **Instructions for Use**
Universal Surgical Pack

Intended Use
Device for covering and isolating the patient and delimiting the surgical field in general surgery operations, to prevent and control the microenvironment of the surgical wound. Intended for professional use in healthcare settings as a mechanical barrier to bacterial migration and for the conveyance of fluids. Equipped with components for covering and isolating surgical tables and equipment, operators, and the patient. Can come into contact with injured skin.

Characteristics
Short-term non-invasive sterile device - not reusable.

Warnings for the User
Use the device before the expiration date indicated on the individual package, exclusively for its intended use. Do not use if the individual package is not intact. Operate aseptically. Do not resterilize, as further sterilization may damage the device. Do not reuse, as optimal cleaning and asepsis conditions cannot be guaranteed after the first use. If a serious incident occurs with the use of the device, the user must promptly report it to the manufacturer and the competent authority of the relevant Member State.

Instructions for Use
Open the package and remove the device, checking its integrity; cover the tables and equipment, ensuring the adherence of the components; wear and fasten the covering components for the operators (this operation may require the assistance of another operator); apply the covering and isolation components to the patient, preferably on dry skin, removing the protective paper from the adhesive and ensuring adherence; unfold the component to cover the patient. Shape any bags and connect the valve (if present) to a drain tube; discard after use.

Side Effects
There is no evidence of toxicity in the materials that make up the product.

Contraindications
Do not keep the device in contact with direct heat sources as it may burn. The device is not antistatic; do not use in the presence of flammable substances. The device should not be used for contact with wounds that may heal by secondary intention.

Disposal
Do not disperse the product in the environment. Dispose of the used device as special waste.
